RON QUITEVIS' TUNDRA PROJECT

Holy schnikes, check out the project 2007 Tundra that FJ Cruiser Trail Team leader Ron Quitevis is building! With Rockstar and Northridge Toyota as the main sponsors, the Tundra features a 5.7L V8 with one of the first TRD superchargers, Sway-A-Way shocks, Total Chaos suspension hardware, custom Bassani exhaust, Demello Offroad sliders, Trick Racing Fuel, BK Fabworks bumpers, Powertank air tanks, DeeZee tool boxes, Line-X bedliner, Nitto tires and the Toyota FJ Cruiser Trail Team. When the truck is complete we'll be looking to do a full feature on it, so stay tuned. Artist rendering by Serge Alexander Design.

TRUCK COVER'S COMPANY TOYOTAS

We have to give props to Truck Covers for using a Tacoma and Tundra as company vehicles to showcase their own and sponsor's products. Truck Covers makes rollback truck bed covers, toolboxes, and the like. The red Tacoma is a 2007 model with RCD lift hardware, Bilstein shocks, Deaver springs, BF Goodrich tires, American Racing wheels, and a Gibson exhaust. The Tundra is a 2006, also with RCD and American Racing components. www.truckcoversusa.com

WORKING 4WD TOYOTA

Spotted in Santa Barbara, CA is this Fusion Yellow FJ Cruiser sporting the logo of www.whosdoinit.com. Don't worry, it's not some weird voyeuristic sex site—we checked. Other than the door art this FJC is pretty much bone stock.
