

Wise Industries spruced up this Tacoma with flames and parts.

The Truck Covers USA Tundra had a unique and eye-catching graphics design, as well as their rear bed covers and similar products. That surfboard is mounted on a Truck Covers unit that swings down (as shown) for loading/unloading, then swings back up on to the roof for storage.

Sway-A-Way head honcho Brian Skipper stands next to RaceRunner shocks that are almost as tall as he is!

There's a new dog in the winch arena—a Bulldog. Bulldog Winches had a booth at SEMA and we checked out their full line. Look for a test soon.
